24 new classics

Each car is lovingly detailed down to the gleaming brass or chrome finish. The scale is accurate and the parts fit true. Every car comes in its own clear plastic showcase for a magnificent display, free from the problems of dust and breakage. Modelers who send in coupons from any four boxes in the series get free wall brackets to turn and attractive display into a sensation. To top it off Renwal gives a free car to anyone sending in four coupons from wall bracket containers. Special counter displays in the stores spread the good news on these 79¢, 89¢ or 99¢ beauties.

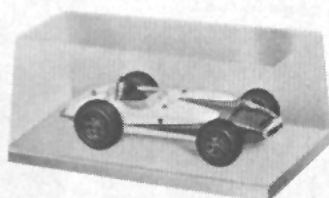

And this is just the beginning. There are many, many more in the works. As you read this, cars are being photographed and measured, plans and drawings on others are being prepared, and the molds on still others are nearing completion. They're coming down the pike and it won't be long before they're in the hands of modelers everywhere.
